

## Becker Cutting Machine BZ 2 – 25

### ■ Highly flexible

The range of cutting widths and axes enable the creation of a custom-tailored solution for you. We transform your ideas into innovation!

The BZ cutting machine allows you to cut from a total of 12 fanfold corrugated card boards in the size and quantity you need.

### ■ Fast

Efficient work steps and solutions, such as the remnant shredder, the lowerable transport unit and the movable cardboard box quick-change unit reduce unnecessary non-productive time and result in a low cycle time and thus a high piece count.

### Special features at a glance:

- Ergonomic belt system with cardboard box clamp facilitates threading into the cardboard box changer
- Lowerable transport unit: Cardboard box blockages can be remedied more quickly
- Movable cardboard box changer: advantages in case of malfunctions, maintenance and repair
- Remnant shredder / shredding roller: no manual removal of cuttings necessary, remnants / offcuts are automatically conveyed under the machine and shredded there
- Depending on the cardboard packaging layout, up to 25% more output than a conventional cutting machine!

### Further advantages of a Becker cutting machine:

- Side-by-side capable: max. 6 sections per 2 pallets with fanfold corrugated cardboard
- Quick changing of up to 12 fanfold corrugated boards thanks to quick-change magazine
- Flexible: individual customer requirements can be implemented at any time
- Sophisticated cutting head technology from our partner Packsize
- Dynamic & modern control technology in cooperation with Beckhoff Automation
- Fanfold bend detection by sensors

### Features:

- Cardboard box quick-change system
- Feeding and conveying system
- Transport unit
- Double cross-cutting possible
- One longitudinal cutting axis with any number of cutting heads (max. 6 per axis)
- Edge trim and remnant shredder / shredding roller

Technical data	BZ 2–25
Max. cutting width	2500 mm
Width	3700 mm
Depth	2760 mm
Height	2500 mm
Weight	3470 kg
Longitudinal machining axes	2
Material	Corrugated cardboard material thickness: 2–7 mm
