

Automatic cutting machine - ZA 630

■ Flexible

The ZA 630 automatic cutter allows you to rolls of material in the size and quantity you need.

■ Fast

Frequently required sizes and quantities are conveniently stored and can be selected at the touch of a button. The Becker ZA 630 has an up-to-date electrical system thanks to the latest control technology from Siemens.

■ Cost-Effective

Rolls are more cost-effective than expensive pre-cuts. No need to store different sizes of material. You cut your material as and when required.

■ Modular

The modular design of the machine safeguards your investment over the long term. Adapting it to meet changing requirements at any times is easily done by retrofitting and upgrading.

Automatic cutting machine made by Becker

The automatic cutting machine ZA 630 made by Becker ist the latest development for cutting flexible blanks from different materials, such as film, paper, corrugated cardboard or foam. The precision-guided cutting carriage and a material press-on with rubber lips can compensate for unevenness in the material and achieve high cutting accuracies.

Please contact us for other options and customisations or if you have any further questions.

Technical specification	ZA 630 – 15	ZA 630 – 20
Roll width	1500 mm	2000 mm
Machine width	2200 mm	2700 mm
Machine depth	650 mm	650 mm
Machine height	1270 mm	1270 mm
Machine weight	360 kg	420 kg

Material thickness	max. 6mm
Roll diameter	max. 1000 mm
Roll weight standard	max. 200 kg
Roll weight heavy-duty	max. 300 kg
Power consumption	4,2 A
Sound level	70 dB (A)

Features:

- Operator terminal with touch screen. User-friendly service menu in plain-text display
- Material press-on by means of rubber lips to flexibly compensate or material unevenness
- Rotary pulse encoder and preselection counter
- Electronic feed rate monitoring including slip compensation
- Blade-changing magazine with cutting knife or blade
- Blank end control with automatic shutdown
- Siemens S7 controller
- Precision-guided cutting carriage

Additional longitudinal separation unit with a variable number of longitudinal cutters for producing different blanks!
